Zepto Inventory Analytics

End-to-end data pipeline from raw dataset to operational intelligence dashboard

Made with GAMMA

Project Overview

Dataset

3,200+ SKUs from Zepto's product catalog across 14 categories

Goal

Identify operational bottlenecks and optimize quick-commerce delivery efficiency

Tools

PostgreSQL for data cleaning, Power BI for visualization

Made with GAMMA

Data Pipeline Architecture

1

Raw Data

CSV from Kaggle

2

SQL Processing

Cleaning & transformation

3

Business Logic

Queries & calculations

4

Power BI

Executive dashboard

Made with GAMMA

SQL Data Analysis

Data Cleaning

Handled null values, converted pricing from paise to INR

Financial Risk

Top 10 highest-value products in warehouse

Revenue Projection

Category-wise estimated revenue calculation

Inventory Audit

High MRP out-of-stock products

Made with GAMMA

Logistics Categorization

Products classified by weight for optimized delivery fleet routing

Low Weight

< 1000g

Standard bike delivery

Medium Weight

1kg - 5kg

Standard vehicle routing

Bulk/Heavy

> 5kg

Specialized handling required

Made with GAMMA

Key Business Insights

12.14%

Out-of-Stock Rate

Supply chain gap indicating revenue leakage

₹2.24M

Total Stock Value

Current inventory valuation

7.90%

Average Discount

Current promotional pricing

₹1,399

Premium Price Point

Highest MRP item in catalog

Made with GAMMA

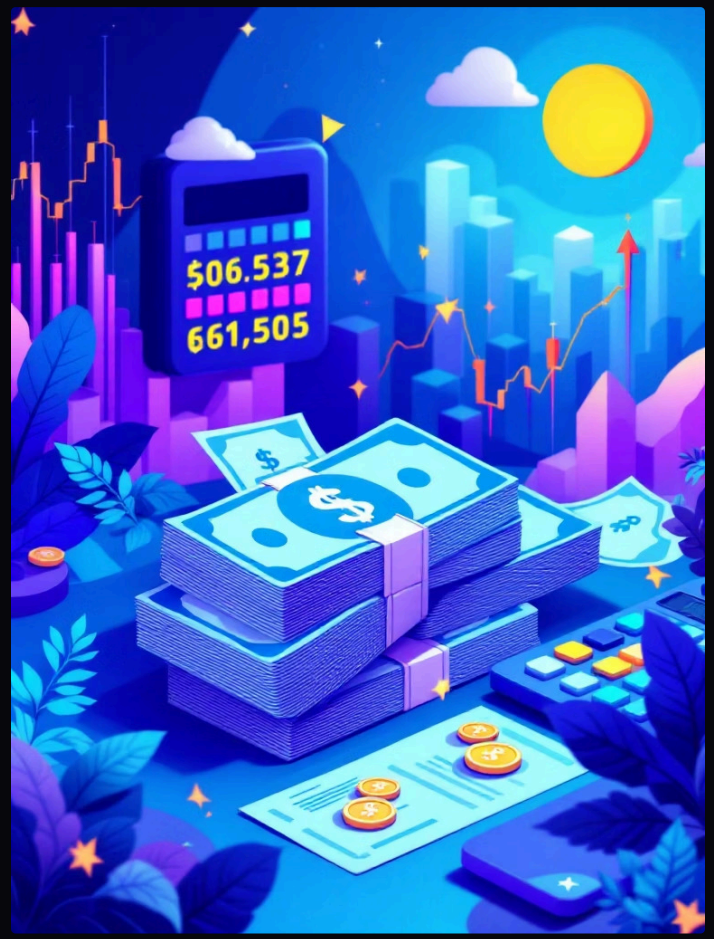
Revenue Concentration

Top 10 High-Value SKUs

Significant capital exposure requiring strict inventory turnover monitoring

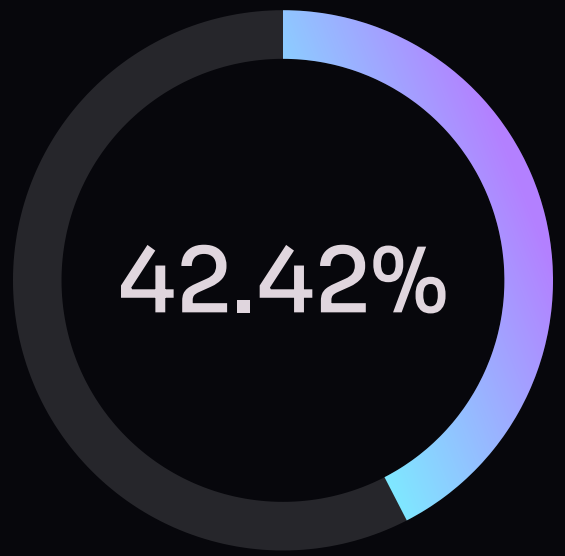
Revenue Projection Formula

Calculated using (discountedSellingPrice × availableQuantity) per category



Made with GAMMA

Logistics Load Distribution



Heavy Load Categories

Cooking Essentials & Munchies dominate warehouse weight

Data Synchronization

No "ghost inventory" detected in system

Made with GAMMA

Operational Challenges

Supply Chain Gap

12.14% of catalog out of stock, creating revenue leakage in high-demand categories

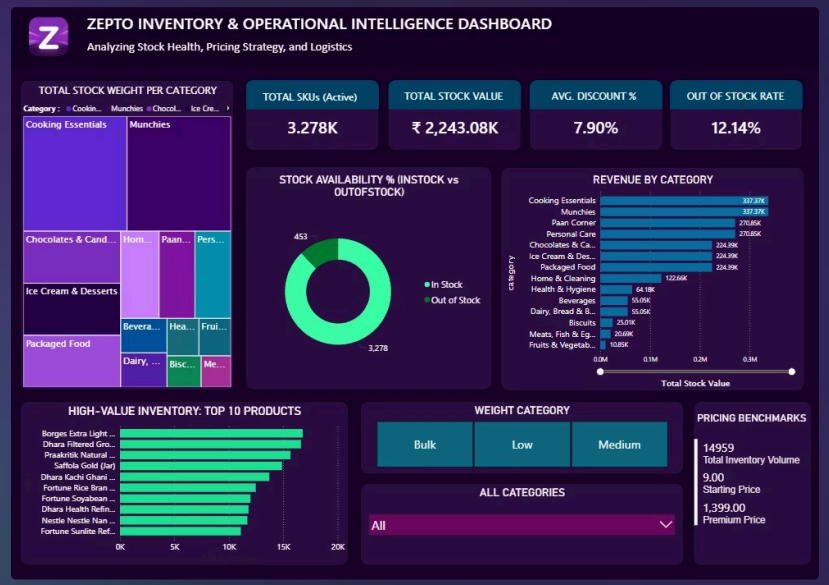
Heavy Vehicle Routing

Cooking Essentials and Munchies require prioritized routing for these zones

Inventory Turnover

Top 10 high-value SKUs need strict monitoring to prevent capital exposure

Made with GAMMA



Dashboard Highlights

Executive KPIs

Real-time tracking of Active SKUs, Total Stock Value, Avg. Discount, and Out-of-Stock Rate

Logistics Treemap

Visualizes logistics mix across 14 categories, highlighting heaviest warehouse loads

Revenue Analysis

Clustered bar chart showing category-wise financial exposure

Stock Health Donut

Quick visual of In-Stock vs Out-of-Stock ratios

Made with GAMMA
